'A global leader in smart adhesives'

For over a century, we have developed smart adhesive solutions that touch and improve people's daily lives. Customers worldwide use our bonding systems in countless applications and across diverse sectors, including industrial manufacturing, construction, electronics, automotive, medical and packaging.

Our products are often invisible to the end-user, but every day they make a significant contribution to the creation of a safer, more efficient and sustainable world.

GLOBAL FOOTPRINT

Bostik is one of the world's largest adhesive and sealant companies.

Adhesive solutions by ARKEMA

We are committed to innovation and continually invest in technological advances in our drive to develop ever more capable and adaptable 'smart' adhesives. This commitment is supported by our parent company, Arkema, a globally renowned manufacturer of specialty chemicals and advanced materials.

Through Arkema, we have access to a worldwide infrastructure and full supply chain, including innovative raw materials, more sustainable sourcing and energyefficient production capabilities.

NEW ENGINEERING ADHESIVES

As engineering adhesive applications develop, they raise new challenges. These include questions of how to apply adhesives to ever-smaller and more complex items, how to accelerate curing processes and how to reduce waste, all while complying with environmental and health and safety regulations.

In response, we have developed a portfolio of ground-breaking engineering adhesives that focus on '**by-the-dot**' bonding applications. These products sit under the **Born2Bond**[™] brand – this name reflects our purpose and the collaborative bond we have with our customers.

Anaerobic Adhesives

The **Born2Bond**[™] high-performance range of anaerobic adhesives has been formulated with sustainability and safety in the workplace in mind. Ideal for fastening and sealing processes including threadlocking, pipe sealing, retaining and gasketing, they offer a more reliable, convenient and cost-effective alternative to traditional mechanical fixings. Excellent resistance to impact, vibration, leakage and corrosion, along with high torque strength make them appropriate in both precision and heavy engineering scenarios. By replacing extensive inventory (such as washers, gaskets, pins, hemp, tapes), they can also help improve efficiency and reduce potential waste.

Delivering on our commitment to create solutions that are safer for users and better for the environment, the adhesives are not solvent based and selected grades are NSF certified. A WL Anaerobic Range specially designed to enhance the work environment and ease the EHS assessment of a new product without compromise on performance, is also available.^{*}

APPLICATIONS AND INDUSTRIES

Born2Bond[™] Anaerobic Adhesives and Service Products are suitable for major applications in target equipment and devices, including:

- Powertrains
- Engines
- Compressors
- Turbines

- Pumps
- Gearboxes
- Centrifuges
- Conveyor belts

- Electric motors
- Pipes and fittings
- HVAC
- And many more...

Born2Bond[™] Anaerobic Adhesives and Service Products are used across a variety of MRO industry segments, including:

- Power generation
- Oil and gas
- Transportation
- Water utilities

- Infrastructure
- Refinery
- Petrochemical
- Marine

- Food and beverage
- Aerospace MRO
- Automotive aftermarket
 And many more...

Respect for the world and workplace

We are committed to developing sustainable adhesives and production methods and to protecting the wellbeing of our customers' workforces.

- Low-energy application processes
- Increased user comfort
- Ideal for preventative maintenance
- A WL Anaerobic Range is also available*

THREADLOCKING

WL Anaerobic Range also available*

Born2Bond[™] **Threadlocking** anaerobic adhesives provide single-component, one-stop solutions for all threadlocking requirements, including preventative maintenance. Eliminating the cost and inconvenience of holding extensive inventory, these liquid adhesives fill and seal all voids to achieve a cohesive connection of metal parts that remains fixed even when subjected to extreme vibrations, temperatures or chemical substances.

FEATURES

- 100% connection no loosening
- Evenly distribute force
- Vibration resistant
- Corrosion prevention
- Single component
- Variety of viscosities and strengths
- Suitable for active and

TYPICAL APPLICATIONS

- Mechanical parts assembly
- Machine engineering
- Gear manufacturing
- Engines and powertrains

0

PIPE SEALING

Born2Bond[™] **Pipe Sealing** anaerobic adhesives are a reliable, adaptable solution, suitable for all types of threaded metal pipes and fittings, and both new installations and preventative maintenance. Filling and sealing all voids, these single component adhesives provide 100% surface-to-surface contact, achieving a cohesive, durable connection that will not fail even when subjected to vibration, extreme temperatures or chemical substances. A convenient, cost-effective alternative to conventional sealing alternatives like hemp or PTFE tapes, these adhesives eliminate the need for additional inventory.

GASKETING

Born2Bond[™] Gasketing anaerobic adhesives are a single-component, cost-effective alternative to conventional pre-formed gaskets on metal flanges. Flexible, durable and resistant to wear and tear, they can be used during installation or for preventative maintenance. Achieving 100% surface-to-surface contact, the adhesives create a cohesive, durable connection that can withstand vibration, extreme temperatures and exposure to oils, solvents and water. They also offer better stress distribution and, unlike traditional gaskets, do not require any 'bedding-in'.

FEATURES

- Outstanding fatigue strength
- Vibration resistant
- Corrosion prevention
- Prevents sagging and micro-movement
- Higher power transmission
- Single component
- Variety of viscosities and strengths
- Instant and flexible seal options

BENEFITS

- Increased reliability
- Less machining
- Easy-to-automate assembly
- Reduced costs
- Reduced storage requirements

RETAINING

Born2Bond[™] **Retaining** anaerobic adhesives are a cost effective, adaptable alternative or addition to mechanical retaining processes. Capable of bonding all types of cylindrical assemblies, these single-component solutions also seal all metal joints to eliminate the risk of fretting corrosion. They achieve 100% surface-to-surface contact, producing a cohesive, durable connection capable of withstanding vibration, extreme temperatures and chemical substances.

ANAEROBIC ADHESIVES RANGE

THREADLOCKING

THREADLOCKING PRODUCT RANGE

Born2Bond[™] Threadlocking adhesives are formulated in low, medium or high strength and available in 50ml and 250ml bottles, suitable for both manual and automated dispensing.

50ml bottles for TA-22, TA-43, TA-70, TA-90 and TA-WL*

250ml bottles for TA-22, TA-43, TA-70, TA-90 and TA-WL*

PIPE SEALING PRODUCT RANGE

Born2Bond[™] Pipe Sealing adhesives are supplied in 50ml and 250ml bottles, suitable for manual and automated dispensing. Manual dispensing-only options are provided by a 50ml accordion or 250ml tube.

PA-42

PA-42

PA-77 and PA-WL*

Anaerobic Adhesives Range

GASKETING

GASKETING PRODUCT RANGE

Born2Bond[™] Gasketing adhesives are supplied in 50ml (accordion) and 250ml (tube) for manual dispensing processes. A 300ml cartridge option enables both manual and automated dispensing.

50ml accordion bottles for GA-10, GA-18, GA-74 and GA-WL*

RETAINING

RETAINING PRODUCT RANGE

Born2Bond[™] Retaining adhesives are offered in 50ml and 250ml bottles, suitable for both manual and automated dispensing. A 50ml accordion is available, suitable for manual dispensing only.

50ml bottles for RA-03, RA-20, RA-38, RA-41, RA-48 and RA-WL*

Born2Bond[™] Join the Adhesive Transformation

* Available in selected regions only. Not classified as a hazardous substance/mixture under the Classification Labelling and Packaging of substances and mixtures (CLP) Regulation (EC) 1272/2008 in EU. Always use glasses and gloves when applying adhesives.

Bostil BORN RON

To ensure optimal performance of **Born2Bond**[™] adhesives, we provide a selection of easy-to-use ancillary products for effective surface preparation, faster curing and removal of cured product.

Born2Bond[™] Anaerobic Activator

SERVICE PRODUCTS

BORN2 BOND

is a solvent-based product that accelerates and supports anaerobic adhesive curing on passive metals like stainless steel, chromated metals and zinc. It can also accelerate cure speed in larger gaps and increase bonding strength.

is suitable for cleaning of all kinds of substrates prior to bonding. Solvent-based and supplied in aerosol form, it will easily remove grease, oil, lubricants and other contaminants without leaving any residue.

FEATURES

- Fast-evaporating with no residue
- Can be used at low temperatures (<5°C)
- On-part lifetime of 30 days

FEATURES

- Fast evaporation
- No residues • Suitable for multiple substrates
- including sensitive plastics

TYPICAL APPLICATIONS

Stainless steel bolts and shafts, threadlocking, pipe sealing, gasketing, retaining.

Metal and plastic parts, composite materials, flanges, bolts, shafts.

Born2Bond[™] Pre-Bonding Cleaner

Born2Bond[™] Adhesive & Gasket

Remover is easy to apply and creates a foam-like layer, softening old gaskets and cured adhesives for removal within 15 minutes.

FEATURES

- · Removes cured gaskets and adhesives within 15 minutes
- Minimal damage to flanges a nd surfaces
- Suitable for multiple substrates

TYPICAL APPLICATIONS

TYPICAL APPLICATIONS

Cleaning of surfaces, flanges, gearboxes, metal housings, pumps.

BEST-PRACTICE BONDING

Substrate and surface preparation

The nature of the substrate and its surface impacts the bondline performance.

- The surface should be cleaned with the appropriate cleaner to eliminate surface contaminants and increase wettability before applying the adhesives and to achieve the best performance.
- For slightly oily surfaces, an oil tolerant product such as Born2Bond[™] TA-43 and Born2Bond[™] RA-03 can be used.
- For cleaning, we recommend **Born2Bond**[™] **Pre-Bonding Cleaner**.

- To remove cured product, we recommend Born2Bond[™] Adhesive & Gasket Remover.
- Mechanical pretreatment (sanding, grinding, laser etching, etc.) will improve the performance, especially for retaining and gasketing applications.
- The curing speed is dependent on material, temperature and gap size.
- To improve the curing speed, or shorten the fixture time, we recommend using **Born2Bond**™ Anaerobic Activator.

Influences on curing speed

Best-practice Bonding

- **Temperature**: the higher the temperature, the faster Gap size: Smaller gaps will have a faster curing than the adhesive will cure. Low temperatures will slow bigger gaps. down the curing.
- Material: Anaerobic adhesives will cure best on "active" substrates like mild steel, aluminum and copper alloys. "Passive" substrates like stainless steel and chrome will slow down the curing.

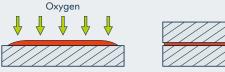

How do anaerobic adhesives cure?

- Anaerobic adhesives cure when excluded from oxygen and with metal contact.
- When applied, the adhesive stays liquid because of the oxygen in the air.
- When assembled (threadlocking, pipe sealing, retaining, gasketing) the cure will start.
- · After full cure, the adhesive is a highly-crosslinked polymer with strong durability.

Application process

The method in which adhesive is applied impacts bondline performance.

- Bondline performance depends on the quantity and consistency of adhesive applied to the surface.
- Adhesives can be applied using automatic dispensing equipment and/or manual systems (e.g. syringes, bottles).
- For precise dosing, use dispensing tips made of plastic (PP, PTFE). Do not use metal dispensing tips. Fully automated systems will improve the control and speed of dispensing.

• Activator: The use of an activator such as Born2Bond[™] Anaerobic Activator will speed up the curing and is recommended on passive materials or cold environments.

PRODUCT FEATURES

The list of features in this table will help you identify which products best match your needs.

BORN2 BOND

BORN2BOND[™] ACADEMY TRAINING

Understanding the specifics of **Born2Bond**[™] products, how they are used, and the properties that make them unique is essential to making the most of their value. Bostik's **Born2Bond**™ Academy offers in-depth training of the products and provides access to resources for technical learning, troubleshooting and more, with all participants receiving a certificate of completion.

Our global team of experts have structured the training to give you a deeper understanding of:

- Technologies
- Applications
- Equipment

The **Born2Bond**[™] Engineering Adhesives team is ready to provide additional tailor-made training, tools and materials, including:

- Case studies
- Application videos
- Product demos

- Demo kits
- Plant surveys
- Seminars and webinars

* Available in selected regions only. Not classified as a hazardous substance/mixture under the Classification Labelling and Packaging of substances and mixtures (CLP) Regulation (EC) 1272/2008 in EU.
